Iddan Gunawan

Mobile Engineer & Engineering Leader

iddandunk@gmail.com · Bandung, Indonesia

GitHub: github.com/iddangunawan · LinkedIn: www.linkedin.com/in/iddan-gunawan/

Professional summary

Mobile engineer and engineering leader focused on native Android, cross-platform products, and connected devices. Experience includes mobile architecture, reusable components, REST API integration, performance optimization, and collaboration across product, design, and engineering.

Work experience

Principal Engineer (Mobile)

Koltiva · Mar 2024 — Nov 2024

KoltiTrace MIS Farm Gate, Farm Extension, and Koltipay. Mobile/IoT connectivity, OTA R&D, and performance optimization.

- Connected IoT devices with mobile applications.
- Researched over-the-air updates for IoT devices through mobile apps.
- Optimized software performance and enhanced existing Android application functionality.

Senior Android Developer

PT. KB Finansia Multi Finance · Jun 2023 — Feb 2024

Sally Mobile, REST API backend work, and cross-functional UI collaboration.

- Developed mobile interfaces and optimized application performance.
- Collaborated with cross-functional design and development teams.
- Created and implemented a RESTful API backend for an Android application.

Senior Android Developer

Tokodistributor - B2B Marketplace · Mar 2020 — May 2023

Android application delivery, custom interfaces, usability, and performance.

- Delivered an Android application from initial concept through production.
- Improved navigation and maintained alignment with Android standards.
- Optimized existing applications and developed custom Android interfaces.

The December 2024 résumé records Mar 2020–May 2023. Indexed LinkedIn lists Android Developer, Jun 2022–May 2023. Both records are retained; the résumé period overlaps other listed roles.

Senior Mobile Developer

PT. Bridgenote Asia · Jan 2022 — May 2022

Bebas Akuntansi: mobile development for cloud accounting.

Senior Frontend Developer

PT. Gajicermat Mandiri Digital Indonesia · Jul 2021 — Dec 2021

Frontend development for payroll and HR products.

Mobile application development (contribution area)

Nusantara Sukses Teknologi · Dates not confirmed

Multiple ManyOption applications, with engagement and crash-rate improvements documented in the CV summary.

Android Developer

SRDStudio · Aug 2017 — Mar 2020

Batian and other Android applications, from UI collaboration to maintenance and performance.

Technical skills

Mobile engineering: Kotlin, Java, Android SDK, Jetpack Compose, Android architecture

Cross-platform development: Flutter, Dart, React Native, React

Architecture & data: REST API integration, Reusable components, Secure data storage, Authentication

Connected devices: BLE / Bluetooth, IoT connectivity, Device communication, OTA workflows

Engineering quality: Performance optimization, Debugging, UI collaboration, Maintainability, CI/CD

Education & training

Management Informatics · Indonesian Computer University
Sep 2011 — Aug 2014

#JuaraAndroid Compose Camp — Oct–Nov 2023

Relevant projects & documented achievements

KoltiTrace MIS

Connecting the dots in agricultural supply-chain traceability.

Contribution: Mobile engineering contributions across Koltiva products, including mobile/IoT connectivity, OTA research and development, and performance optimization.

iddangunawan.github.io/projects/koltitrace-mis/

Tokodistributor

Bringing B2B and O2O commerce into the hands of entrepreneurs.

Contribution: Android application delivery, usability improvements, custom interface development, and performance work.

Technologies: Android, Kotlin

iddangunawan.github.io/projects/tokodistributor/

AroundChess

A place to play, analyse, and find your next move.

Personal contribution details are not yet published.

iddangunawan.github.io/projects/aroundchess/

GlobalPark

Mobile tools for the everyday operations of parking management.

Contribution: Credited as Senior Mobile Developer in the supplied GlobalPark presentation. The presentation documents the product's technology and integrations; it does not attribute ownership of every feature.

Technologies: Flutter, Dart, Firebase, Mapbox

iddangunawan.github.io/projects/globalpark/

Sally Mobile

Less paperwork. A smoother path to financing submissions.

Contribution: Android development, REST API backend work, collaboration with UI designers, and investigation and resolution of system issues.

Technologies: Android, Kotlin

- Resolved more than 20 system issues, as recorded in the supplied CV summary.

iddangunawan.github.io/projects/sally-mobile/

Batian

Simple financial records for the smallest businesses.

Contribution: Android application development at SRDStudio. The documented role also included collaboration with UI designers, application maintenance, debugging, and secure storage and authentication work across its applications.

Technologies: Android
