SELECTED PROJECT PORTFOLIO / IDDAN GUNAWAN

Iddan Gunawan

Mobile Engineer & Engineering Leader

iddandunk@gmail.com · Bandung, Indonesia

GitHub: github.com/iddangunawan · LinkedIn: www.linkedin.com/in/iddan-gunawan/

Good code.
Better experiences.

Mobile engineer and engineering leader focused on native Android, cross-platform products, and connected devices. Experience includes mobile architecture, reusable components, REST API integration, performance optimization, and collaboration across product, design, and engineering.

Android · Cross-platform · Connected devices

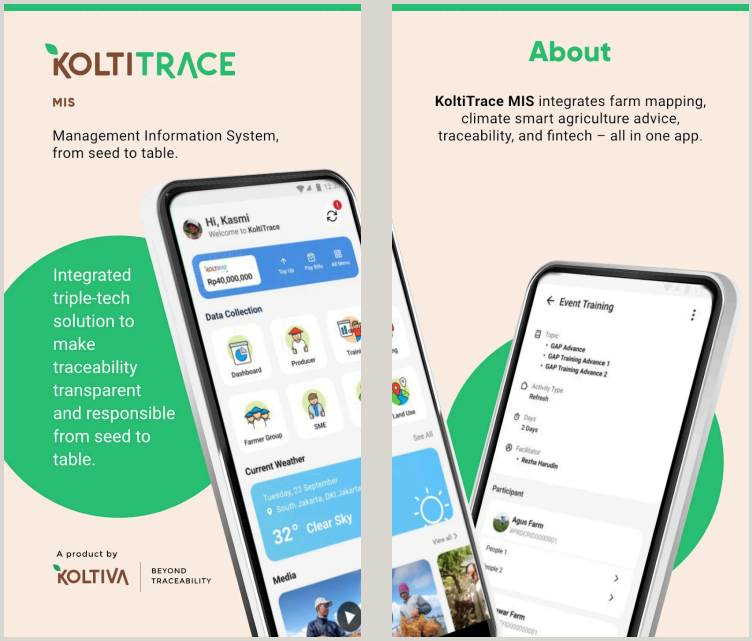

A selection of six projects. Product context and personal contributions are presented separately. Store imagery may show versions released after my involvement.

GlobalPark

GlobalPark combines parking operations and a digital wallet for end users, operators, and corporate users. The supplied presentation documents parking entry and exit, vehicle tracking, payments, maps, and reporting across iOS and Android.

My contribution

Credited as Senior Mobile Developer in the supplied GlobalPark presentation. The presentation documents the product's technology and integrations; it does not attribute ownership of every feature.

Documented technologies: Flutter, Dart, Firebase, Mapbox

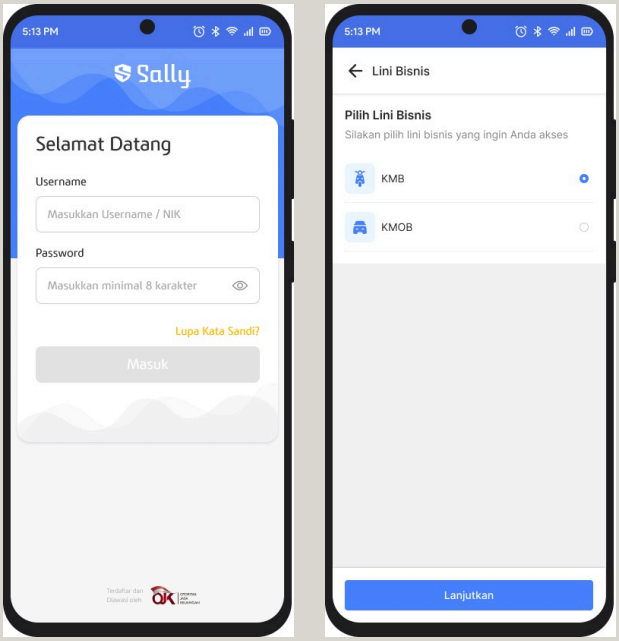

Official product imagery: DoubleLogic Sdn Bhd.
